

If you play this game, you need this table.

GRANGER LUCKY SEVEN
SEVEN SIDED POKER TABLE

This is a serious table.

You've got seven players. Now you have seven sides.

You want every advantage and zero distractions.

This table doesn't wobble. It won't tip or lean. It has no legs for your opponents to knock into.

Each side has two chip racks, two drink holders—one for bottles, one for highballs or an ashtray, a recessed card well with sloped card / chip slide. All molded right in. Nothing to lose, nothing to break. Wipe to clean.

This table gives you home field advantage.

Choose your base, tabletop and tray colors separately. Match your game cave décor. Or the colors of your favorite team. Or get classy with custom granite mixtures that look like real stone. For an additional charge, we'll even personalize the table top with your club's personal motto, crest or logo. Or your own.

This table is beautiful, but it's also tougher than nails. Bolts together in minutes (all fasteners hidden from view.) Tabletop disassembles intact from base for quick storage. All-weather components let you play indoors or outdoors.

Can your table do any of this? Can *any* poker table do this? Not for under a thousand dollars like this one. And we'll bet on that.

Custom colors and imprints cost extra and may require quantity orders.

GRANGER LUCKY SEVEN

SEVEN SIDED POKER TABLE

© 2010 Granger Plastics Co.
